

Faculty of Technology - University of Sri Jayewardenepura

Year 2 Semester 1

**ITC 2303 – Visual Application Programming**

**Assignment 2**

---

**Task -** This is an **individual** assignment. You need to conceptualize a creative idea and build a **windows forms application using C# and Visual Studio IDE**.

The application must include:

- **multiple forms** with data being passed from one form to another. (At least 2 forms.)
- at least 10 **different** controls available in the toolbox.
- The controls used must have some **logical** implementation coded. You must use conditional branching and looping; at least one from each.
- You may refer C# official documentation as well for your implementations.

**Guidelines for the submission -**

- 1) Submission can be done only through the **LMS**.
- 2) Please compress your Visual Studio project after the complete development and upload the **compressed folder**.
- 3) Deadline for submission is **before 11.55 pm on 8th January 2022**.
